

CARRIER CRAWLER

RUBBER TRACKS • IDLERS • ROLLERS • SPROCKETS

Ktsu[®]
AMERICA

KTSU America has been on top of the ever-growing carrier crawler market's undercarriage needs. Consistent with the rest of our undercarriage lineup we have invested time in development and design to keep your Terramac[®] and Morooka[®] machine in the dirt... not the shop. But when the time comes to invest into your undercarriage know that your KTSU dealer will reduce your downtime and save some change in your pocket.

1. The tread life on a KTSU track will go farther when others brands won't
2. Our rollers and idlers will still retain oil and keep turning when other brands are dry and locked
3. KTSU segment groups prolong track life instead of diminishing it.

Many undercarriages may appear the same at the time of install... but only a KTSU undercarriage will be on the jobsite long after the others are scrapped. Maximize your operating cost and service life with KTSU undercarriage parts.
